Assignment 2

Submitted By: Minahil Amjad – FA24-BCS-053-B

Instructor: Sir Usman

Date: 27 Oct 2026

Department of Computer Science

Statement:

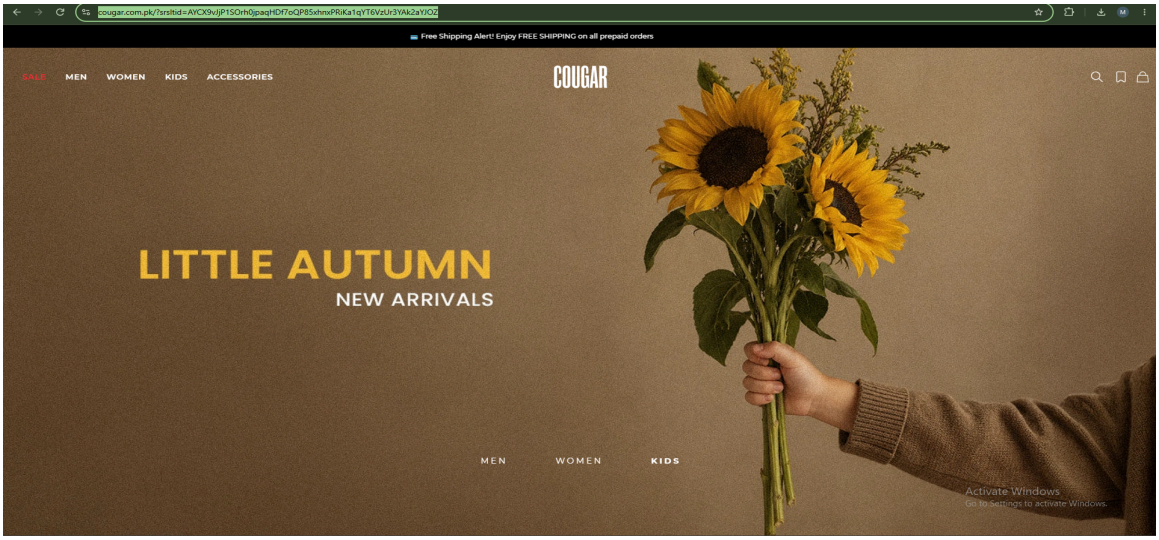

Assignment 2 — Your E-commerce Site: Static, Responsive Pages

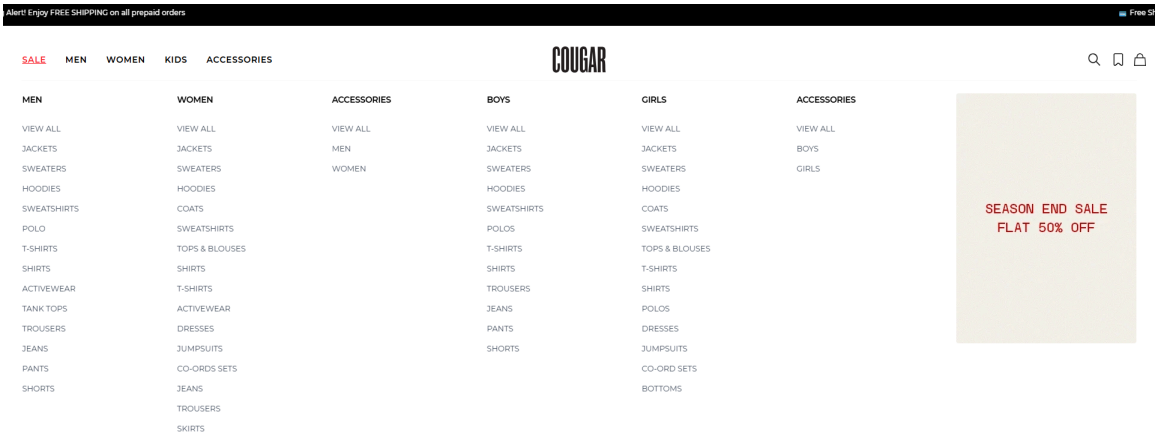

Task: Build the static, responsive front page and product page of your e-commerce site, modeled on your chosen reference site. No JavaScript yet — this assignment is entirely about layout, styling, and responsiveness.
You must build:

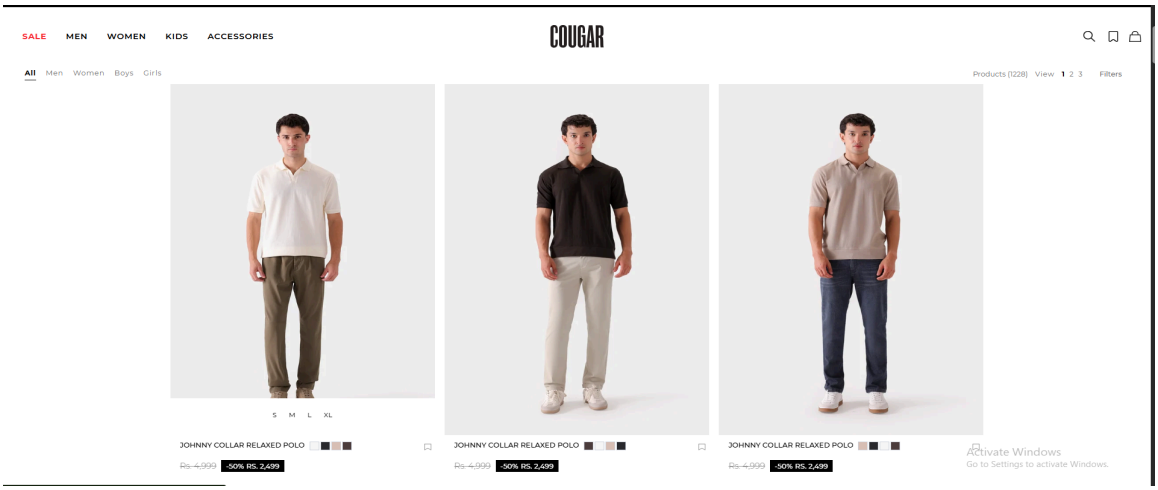

- A homepage / product listing page with a header (site name/logo, a nav bar, a cart icon that does not need to work yet) and a responsive grid of at least 8 product cards (image, name, price, an “Add to Cart” button that does not need to work yet).
- A single product detail page for one product: larger image, name, price, description, quantity selector, and an “Add to Cart” button (again, not functional yet).
- A consistent footer across both pages.
- The whole layout built with Flexbox and/or CSS Grid — no table-based layout, no absolute-positioning-everything.
- Genuine responsiveness: the layout must reflow sensibly at a phone width (~375px), a tablet width (~768px), and a desktop width, using media queries or your framework’s responsive grid classes. Screenshot all three widths for your completion PDF.
- Either Bootstrap or Tailwind (your choice) used for at least the grid/layout and the navbar — this is the frameworks half of Lecture 10, and it should actually be doing real work in your layout, not just be linked and unused.
