

WEB TECHNOLOGIES

Assignment 1

Submitted By	Minahil Amjad – FA24-BCS-053-B
Instructor	Sir Usman
Date	28 Sep 2026

Department of Computer Science

Statement

Assignment 1 — Your Personal CV Page

Difficulty: Foundational · **Covers:** Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · **Folder:** assignment-1/

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An “About Me” section.
- An “Education” section listing your academic history in a semantic list or table.
- A “Skills” section.
- A “Contact” section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not inline `style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Deliverables in assignment-1/: `index.html`, `styles.css`, any images, and your completion PDF.

AboutEducationSkillsExperienceProjectsContact

About Me

Computer Science undergraduate with strong technical, organizational, and communication skills. Interested in software development, web development, and design.

Education

- COMSATS University Islamabad**
BS Computer Science | 2024 - 2028
- Kinnaird College for Women**
FSc Pre-Engineering | 2022 - 2024

Skills

- Java
- Python
- C++
- HTML
- CSS
- Data Structures and Algorithms
- Canva
- Figma

Experience

Intern - TechPartner

Web Technology

Completed an internship focused on web technologies and gained practical experience in web development.

Projects

Credit Card Fraud Detection System

Machine learning project for detecting fraudulent transactions.

Sport Management System

Database management system for managing sports-related records.

Brick Breaker Game

Java-based game using object-oriented programming concepts.

Obstacle Game

Java game demonstrating object-oriented programming concepts.

DSA Visualizer

Java project for visualizing basic data structures.
